✦ Tips to keep safe online ✦

Passwords & Access: Use complex, unique passwords for all accounts and enable two-factor authentication (2FA) for extra security. Use password managers to securely store credentials.

Privacy & Sharing: Adjust social media privacy settings, keeping profiles private to limit who can view posts. Never share personal info like home addresses or bank details.

Recognizing Scams: Be cautious of urgent emails or messages asking for information (phishing). Verify the authenticity of websites, looking for "https" and a lock icon in the browser bar.

Digital Footprint: Assume anything posted online is permanent. Consider the long-term impact on your reputation before posting or sharing, especially images.

Secure Browsing: Avoid public, unsecured Wi-Fi for financial transactions or logging into sensitive accounts.
